

# React Dev Tools

- Browser Extension
- Great for debugging React issues in browser
- Continue to debug HTML/CSS as normal

# Installing

- Go to Chrome Extension "store"
  - Firefox as a version as well
- Install extension

# Using React Dev Tools

- Two tabs in browser dev tools
  - Components
    - Lets you inspect React components
      - read and update state
  - Profiler
    - Lets you record a set of interactions
      - See where your render time is spent
